Eastern Europe is a region that lacks a universally accepted definition, which contributes to confusion about its exact location. Generally, it refers to the eastern part of the European continent, but its boundaries can vary depending on historical, cultural, and political perspectives. Geographically, Eastern Europe is often described as the area between the Ural Mountains to the east, which separate Europe from Asia, and the central European countries to the west.

Geographers and scholars typically consider Eastern Europe to include countries east of Germany and Austria, extending eastward to Russia's western border. The northern boundary is the Arctic Ocean, and to the south, it borders the Balkan Peninsula and the Black Sea. The region is characterized by diverse landscapes, including plains, forests, and mountain ranges such as the Carpathians.
