Wire Color Codes and Functions

Wire color coding is standardized to help identify each wire's function in the stereo wiring harness. The 2002 Chevy Tahoe stereo wiring diagram uses specific colors for power, ground, speaker outputs, and other signals. Understanding these colors and their corresponding functions is critical for accurate wiring and troubleshooting.

Common Wire Colors and Their Roles

The following list outlines the typical wire colors found in the 2002 Chevy Tahoe stereo system and their functions:

- **Yellow:** Constant 12V (Battery Power) – supplies continuous power to retain memory functions
- **Red:** Switched 12V (Ignition Power) – powers the stereo when the ignition is on
- **Black:** Ground – connects to vehicle chassis for grounding
- **Blue:** Power Antenna or Amplifier Turn-On – activates external devices
- **White and White/Black:** Front Left Speaker (+/-)
- **Gray and Gray/Black:** Front Right Speaker (+/-)
- **Green and Green/Black:** Rear Left Speaker (+/-)
- **Purple and Purple/Black:** Rear Right Speaker (+/-)
- **Orange or Orange/White:** Illumination/Dimming

Correctly matching these wire colors during installation ensures proper stereo function and audio output.

Speaker Wiring and Connector Pinouts
