What is Bio True Solution?

Bio true solution is a multi-purpose contact lens solution specifically formulated for cleaning, disinfecting, rinsing, and storing soft contact lenses. It is designed to maintain the natural moisture of lenses, making them comfortable to wear throughout the day. The formula contains ingredients that mimic the composition of the eye's natural tears, which helps in reducing dryness and irritation. Bio true solution is widely recommended by eye care professionals for its effectiveness and compatibility with various types of soft lenses, including silicone hydrogel lenses.

Composition and Key Ingredients

The solution includes a blend of moisturizing agents, disinfectants, and preservatives that work together to clean lenses and protect eyes from harmful microorganisms. Key components often include:

- Hyaluronic acid: Provides hydration and enhances comfort.
- Polyquad and Aldox: Serve as disinfectants to eliminate bacteria and fungi.
- Buffers and salts: Help maintain pH balance and lens integrity.

These ingredients collectively ensure that lenses remain free from deposits and pathogens while maintaining a natural feel upon insertion.

How Does Bio True Solution Work?

Bio true solution works by combining cleaning and disinfecting processes into one convenient step, allowing users to maintain their lenses effectively without needing multiple products. Upon lens removal, the solution is used to rinse away debris and protein build-up, then the lenses are soaked in the solution to kill microorganisms and prevent infections.

Mechanism of Action

The disinfectants in bio true solution target common pathogens such as bacteria, fungi, and acanthamoeba, which can cause serious eye infections. Meanwhile, moisturizing agents replenish the lens surface, ensuring that lenses do not dry out or become uncomfortable during wear. This dual action promotes both safety and comfort for lens users.

Compatibility with Contact Lenses

Bio true solution is compatible with most soft contact lenses, including daily, bi-weekly, and monthly replacement lenses. Its gentle formula is suitable for sensitive eyes and helps preserve the lens material, extending the usability of lenses within their recommended replacement schedules.

Benefits of Using Bio True Solution

Choosing bio true solution offers multiple advantages that contribute to eye health and lens wear satisfaction. These benefits make it a preferred choice among contact lens users and eye care professionals alike.

Enhanced Comfort and Hydration

The presence of hyaluronic acid and other moisturizing agents helps maintain lens hydration, reducing dryness and irritation commonly experienced with lens wear.

Effective Disinfection and Cleaning

Bio true solution effectively removes protein deposits, debris, and harmful microorganisms, minimizing the risk of eye infections such as keratitis and conjunctivitis.

Convenience and Multipurpose Use

Its all-in-one formula simplifies lens care routines by combining cleaning, rinsing, disinfecting, and storing functions into a single product.

Compatibility and Safety

Formulated to be gentle on eyes and compatible with a broad range of lens types, bio true solution reduces the likelihood of allergic reactions or lens damage.

Summary of Benefits

- Maintains natural moisture of lenses
- Eliminates bacteria and fungi effectively
- Prevents protein and debris buildup
- Supports lens integrity and longevity
- Suitable for sensitive eyes

How to Use Bio True Solution Properly

Proper use of bio true solution is essential to maximize its effectiveness and ensure the safety of contact lens wearers. Following recommended steps can help maintain eye health and lens performance.

Step-by-Step Usage Instructions

1. Wash and dry your hands thoroughly before handling lenses.
2. Remove lenses from your eyes carefully.
3. Place the lenses in the palm of your hand and apply several drops of bio true solution.
4. Gently rub each lens for about 20 seconds to remove debris.
5. Rinse lenses thoroughly with fresh bio true solution.
6. Place lenses in a clean lens case filled with fresh bio true solution for at least 4 to 6 hours to disinfect.

7. Before inserting lenses, rinse them again with bio true solution.
8. Replace the solution in the lens case daily and clean the case regularly.

Adhering to these steps helps prevent contamination and maintains optimal lens condition.

Storage and Handling Tips

Store bio true solution at room temperature, away from direct sunlight and heat sources. Do not use expired solution or share your lens case or solution with others to avoid cross-contamination.

Safety and Precautions

While bio true solution is generally safe for most users, certain precautions must be observed to prevent adverse effects or complications.

Potential Side Effects

Some users may experience mild irritation or allergic reactions due to sensitivity to preservatives or other ingredients. If redness, itching, or discomfort occurs, discontinue use and consult an eye care professional.

Important Safety Guidelines

- Never use tap water or saliva to clean or store lenses.
- Do not reuse or top off old solution in the lens case.
- Keep the solution bottle tightly closed when not in use.
- Follow the expiration date on the solution packaging.
- Consult your optometrist before switching to a new lens solution.

Proper adherence to these safety measures minimizes the risk of eye infections and ensures comfortable lens wear.

Frequently Asked Questions about Bio True Solution

Addressing common inquiries can provide additional clarity about bio true solution para que sirve and its practical use.

Is Bio True Solution Suitable for All Soft Contact Lenses?

Yes, bio true solution is formulated to be compatible with most soft contact lenses, including silicone hydrogel and conventional hydrogel lenses.

Can Bio True Solution Be Used for Hard or Rigid Gas Permeable Lenses?

No, bio true solution is intended for soft lenses only. Hard or rigid gas permeable lenses require specialized cleaning solutions.

How Long Should Lenses Soak in Bio True Solution?

Lenses should be soaked for a minimum of 4 to 6 hours to ensure proper disinfection. Overnight soaking is commonly recommended.

Does Bio True Solution Help with Dry Eyes?

While it does not treat dry eye syndrome, the moisturizing components help in maintaining lens hydration, which can alleviate dryness associated with lens wear.

Can Bio True Solution Be Used Daily?

Yes, it is designed for daily lens care routines, including cleaning, rinsing, and storing lenses overnight.

Frequently Asked Questions

¿Para qué sirve Bio True Solution?

Bio True Solution es una solución multipropósito para lentes de contacto que limpia, desinfecta, enjuaga y humecta los lentes para mantenerlos cómodos y seguros de usar.
