Definition and Context

In the realm of Geometry Dash, cursed images are not official artwork but rather fan-made creations or accidental glitches captured and circulated

online. They typically leverage the game's distinctive geometric design and neon color palette to produce visuals that deviate significantly from the norm. This deviation is what classifies them as "cursed," capturing attention through their unsettling or surreal qualities.

Why Are These Images Created?

The creation of cursed Geometry Dash images stems from various motivations, including artistic experimentation, humor, and commentary on game glitches or bugs.
