Swedish Massage

Swedish massage is one of the most common methods used at Fossil Creek. It

involves long, flowing strokes, kneading, and circular movements to relax muscles and improve circulation. This technique is ideal for clients seeking stress relief and general relaxation.

Deep Tissue Massage

Deep tissue massage focuses on the deeper layers of muscle and connective tissue. It is particularly beneficial for individuals with chronic muscle tension or injuries. Therapists apply firm pressure to target specific problem areas, facilitating muscle repair and pain reduction.
