Overview of Freddy's Frozen Custard & Steakburgers Menu

Freddy's Frozen Custard & Steakburgers menu nutrition encompasses a wide variety of classic American fast food items. Freddy's specializes in steakburgers made from high-quality beef, accompanied by fresh toppings and toasted buns. Alongside the main courses, the menu features hand-spun frozen custard desserts, crispy sides, and refreshing beverages. Nutritional information is transparently provided to help customers evaluate calorie counts, fat content, protein levels, and carbohydrate amounts. This overview covers the nutritional composition across different meal categories, ensuring a comprehensive understanding of what Freddy's offers. The menu balances indulgence with options that can fit into various dietary needs, such as lower-calorie or higher-protein selections. Freddy's commitment to serving fresh, flavorful food is reflected in the detailed nutrition facts available

for each item.

Steakburgers Nutrition Information

The steakburgers at Freddy's are the centerpiece of the menu and provide a substantial source of protein and energy. Each burger features a USDA Choice steak patty cooked to perfection, served on a toasted bun with standard toppings like mustard, ketchup, pickles, and onions. Customers can customize their steakburgers with cheese, bacon, or additional condiments, each affecting the overall nutritional profile.

Calorie and Macronutrient Breakdown

Typical Freddy's steakburgers range from approximately 350 to over 700 calories depending on size and extras. Protein content usually falls between 30 to 50 grams per burger, making them a robust protein source. Fat content varies widely due to cheese and bacon additions, generally between 15 and 40 grams. Carbohydrates are mostly derived from the bun and any sweet sauces or condiments added.

Popular Steakburger Options

- **Original Double Steakburger:** Two steak patties, cheese, mustard, ketchup, pickles, and onions with about 670 calories and 43 grams of protein.
- **Single Steakburger:** A single patty with standard toppings, approximately 390 calories and 30 grams of protein.
- **Bacon Cheese Steakburger:** Includes crispy bacon and cheese for an added flavor and roughly 750 calories.

Frozen Custard and Dessert Nutrition

Freddy's frozen custard is a signature item, known for its creamy texture and rich flavor. Made fresh daily, the frozen custard is lower in fat than typical ice cream but still provides indulgent satisfaction. Nutritional content varies based on serving size and mix-ins such as chocolate or caramel swirls, nuts, or cookie crumbles.

Custard Calorie and Sugar Content

A standard small serving of vanilla or chocolate frozen custard contains around 250 to 300 calories, with sugar content typically between 20 and 30 grams. Adding toppings or mix-ins increases both calories and sugar levels. Custard is also a source of calcium and protein, with about 7 to 10 grams of protein per serving.

Dessert Variations and Their Nutrition

- **Concrete Mixers:** Custard blended with various toppings such as Oreos, Butterfinger, or peanut butter; calories range from 400 to 800 depending on size and ingredients.
- **Sundaes:** Frozen custard topped with hot fudge, caramel, nuts, or whipped cream, averaging 350 to 600 calories.
- **Shakes and Malts:** Thick custard-based shakes with flavorings, typically containing 600 to 900 calories.

Sides and Appetizers Nutrition Details

Freddy's offers a range of sides and appetizers that complement their main dishes. These include shoestring fries, crispy onions, fried mushrooms, and pickles. Nutritional values of these sides vary considerably, providing options for both indulgent and lighter accompaniments.

Caloric and Fat Content of Common Sides

Shoestring fries, one of the most popular sides, contain approximately 300 to 400 calories per serving with significant amounts of fat due to frying. Fried mushrooms and onion rings are higher in calories and fat because of the batter and oil content. Pickle chips and other vegetable-based sides offer lower calories and fat, making them a healthier choice.

List of Common Sides with Nutritional Highlights

- **Shoestring Fries:** About 320 calories, 17 grams of fat
- **Crispy Onion Rings:** Approximately 400 calories, 22 grams of fat
- **Fried Mushrooms:** Around 350 calories, 18 grams of fat

- **Pickle Chips:** Roughly 120 calories, 6 grams of fat
- **Side Salad:** Low in calories, typically under 100, depending on dressing

Beverages and Extras Nutrition

Freddy's beverage options include soft drinks, iced tea, coffee, and milkshakes. While many beverages are calorie-free or low-calorie, milkshakes and flavored drinks contribute additional sugars and calories. Extras such as sauces and dressings also impact the overall nutritional intake.

Calories and Sugar in Beverages

Soft drinks and iced teas without added sugar contain zero or minimal calories. However, regular sodas range from 150 to 250 calories per serving. Milkshakes are calorically dense, often exceeding 700 calories per serving due to custard, syrups, and whipped toppings.

Common Extras and Nutritional Impact

- **Ketchup and Mustard:** Low calorie, typically under 20 calories per serving
- **Mayonnaise and Special Sauces:** Higher in fat and calories, ranging from 50 to 100 calories per portion
- **Cheese and Bacon Add-ons:** Add approximately 70 to 150 calories depending on amount

Tips for Making Healthier Choices at Freddy's

Choosing healthier options at Freddy's involves understanding menu nutrition and customizing orders accordingly. Opting for single steakburgers without cheese or bacon reduces calorie and fat intake. Selecting sides like a side salad or pickle chips instead of fried options can lower overall meal calories. For dessert, smaller frozen custard servings without heavy toppings help control sugar and calorie consumption. Drinking water or unsweetened iced tea instead of sugary sodas is another effective strategy. Being mindful of sauces and extras also contributes to a balanced meal.

Practical Recommendations

1. Choose single or junior hamburgers to limit calories and fat.
2. Select grilled or fresh toppings rather than fried sides.
3. Limit cheese, bacon, and creamy sauces to reduce saturated fat.
4. Opt for smaller frozen custard sizes without extra mix-ins.
5. Prefer water or unsweetened beverages over sugary drinks.

Frequently Asked Questions

What are the calorie counts for popular items on Freddy's Frozen Custard & Hamburgers menu?

Calorie counts vary by item; for example, the Freddy's Original Double Cheeseburger has around 770 calories, the Chicago Dog has approximately 350 calories, and a small vanilla frozen custard cup contains about 290 calories.

Does Freddy's offer any low-calorie options on their menu?

Yes, Freddy's offers several lower-calorie options such as the Grilled Chicken Sandwich with about 380 calories and the Veggie Burger, which has roughly 420 calories.

Are nutritional details like fat, protein, and carbs available for Freddy's menu items?

Yes, Freddy's provides detailed nutrition information including fat, protein, carbohydrates, sodium, and calorie content for all menu items on their official website.

Does Freddy's menu include allergen information for people with dietary restrictions?

Yes, Freddy's offers allergen information indicating the presence of common allergens such as gluten, dairy, soy, and nuts to help customers with dietary restrictions make informed choices.

How does Freddy's frozen custard compare nutritionally to their hamburgers?

Freddy's frozen custard tends to be higher in sugar and calories per serving compared to hamburgers, which are higher in protein and fat. For example, a regular custard serving can have around 300 calories, while a hamburger ranges from 500 to 800 calories depending on toppings.

Are there any vegetarian or vegan options at Freddy's with nutritional information available?

Freddy's offers a Veggie Burger option, and nutritional details are available on their website. However, vegan options are limited due to the use of dairy and meat products in many items.

Can customers customize their meals at Freddy's to reduce calorie or fat content?

Yes, customers can customize meals by choosing grilled options, skipping cheese or sauces, and selecting smaller portions to reduce calories and fat content.

Where can I find the most up-to-date nutrition facts for Freddy's Frozen Custard & Hamburgers menu?

The most up-to-date nutrition facts can be found on Freddy's official website under their nutrition section or by requesting a nutrition brochure at their restaurant locations.
