It validates fundamental knowledge of project management processes, terminology, and methodologies as outlined in the PMBOK® Guide. The exam is designed for individuals seeking to enhance their project management skills and advance their careers. Its primary focus is on assessing understanding of project management frameworks, knowledge areas, and process groups.

Exam Format and Content

The CAPM exam consists of 150 multiple-choice questions that must be completed within three hours. These questions cover a wide range of topics including project integration, scope, schedule, cost, quality, resource, communication, risk, procurement, and stakeholder management. Understanding the exam structure helps candidates allocate study time appropriately and become comfortable with the question format.

Eligibility and Requirements

To qualify for the CAPM exam, candidates must have either a secondary diploma (high school diploma, associate's degree, or global equivalent) with 23 hours of project management education or 1,500 hours of project experience.
