Academic Programs Offered

The Fresno State Psychology Department provides a variety of academic programs aimed at preparing students for careers in psychology, counseling, research, and related fields. These programs are structured to deliver foundational knowledge as well as specialized training in key psychological disciplines.

Undergraduate Degree Programs

The department offers a Bachelor of Arts (B.A.) and Bachelor of Science (B.S.) in Psychology. Both degrees cover essential topics such as developmental psychology, abnormal psychology, cognitive processes, and research methods. The curriculum integrates lectures, laboratory work, and experiential learning to foster a deep understanding of psychological principles.

Graduate and Postgraduate Programs

Graduate offerings include a Master of Science (M.S.) in Psychology with various emphases such as clinical psychology, industrial-organizational psychology, and counseling psychology. These

programs focus on advanced theoretical knowledge, research methodologies, and applied skills necessary for professional practice or doctoral study preparation.

Specialized Certificates and Workshops

In addition to degree programs, Fresno State Psychology Department provides certificates and workshops targeting specific areas such as behavioral health, neuropsychology, and trauma-informed care. These opportunities enhance professional development and support lifelong learning among students and practitioners.

Faculty and Research Expertise

The Fresno State Psychology Department boasts a diverse faculty team with expertise across multiple psychology subfields. Faculty members are committed to fostering academic excellence and contributing to the broader scientific community through innovative research.

Research Areas and Projects

Faculty research spans various domains including cognitive neuroscience, social behavior, developmental psychopathology, health psychology, and multicultural counseling. Many professors lead funded research projects that involve students in data collection, analysis, and dissemination of findings.

Faculty Achievements and Publications

Professors in the department have published extensively in peer-reviewed journals and presented at national and international conferences. Their work contributes to advancing knowledge and informs evidence-based practices in psychology.

Student Resources and Support Services

The Fresno State Psychology Department offers a range of resources designed to support student success academically, professionally, and personally. These services aim to enhance the learning experience and promote well-being.

Advising and Mentorship

Students receive individualized academic advising to help plan their coursework and career trajectories. Faculty mentors also provide guidance on research opportunities, internships, and graduate school applications.

Psychology Laboratories and Facilities

The department maintains state-of-the-art laboratories equipped for experimental research, psychophysiological studies, and behavioral observations. These facilities enable students to engage in hands-on learning and contribute to ongoing research.

Student Organizations and Activities

Active psychology clubs and honor societies offer networking, leadership development, and community service opportunities. These organizations foster collaboration and professional growth among psychology students.

Career Prospects and Alumni Success

Graduates of the Fresno State Psychology Department are well-prepared for diverse career paths in psychology, healthcare, education, and human services. The department's emphasis on practical skills and research experience enhances employability and graduate study readiness.

Employment Opportunities

Alumni find positions in clinical settings, schools, social service agencies, research institutions, and corporate environments. Common roles include mental health counselor, behavioral analyst, research assistant, and human resources specialist.

Graduate School Placement

The department has a strong track record of placing graduates in competitive doctoral and professional programs across the country. Preparation includes research experience, strong faculty recommendations, and comprehensive training in psychological theory and practice.

Alumni Network and Career Support

Fresno State Psychology Department maintains an active alumni network that supports current students through mentoring, internship placements, and career advice. Career services also host workshops on resume building, interview preparation, and job search strategies.

Community Engagement and Outreach

Community involvement is a key component of the Fresno State Psychology Department's mission. The department collaborates with local organizations to apply psychological knowledge for social benefit.

Service Learning and Volunteer Programs

Students participate in service learning projects addressing mental health awareness, substance abuse prevention, and youth development. These experiences provide practical training while benefiting the Fresno community.

Public Workshops and Educational Events

The department organizes workshops, seminars, and public lectures on topics such as stress management, diversity and inclusion, and psychological resilience. These events promote mental wellness and public understanding of psychology.

Partnerships with Local Agencies

Collaborations with schools, healthcare providers, and nonprofit organizations create internship opportunities and facilitate applied research initiatives. These partnerships enhance student learning and community impact.

- Bachelor of Arts and Bachelor of Science in Psychology
- Master of Science programs with clinical and counseling emphases
- Faculty research in cognitive, developmental, and social psychology
- State-of-the-art laboratories and student organizations
- Career support and strong alumni network
- Community service, workshops, and local partnerships
