Behavioral Questions and How to Answer Them

Behavioral questions are a core component of frontier airlines flight attendant interview questions. These questions require candidates to reflect on past experiences to demonstrate their competencies. The airline uses behavioral interviewing to assess how applicants have handled situations related to teamwork, conflict resolution, and customer service.

Using the STAR Method

The STAR (Situation, Task, Action, Result) method is highly recommended when responding to behavioral questions. This structured approach helps candidates provide clear and concise answers:

- **Situation:** Describe the context within which you performed a task or faced a challenge.
- **Task:** Explain the actual task or responsibility involved.
- **Action:** Detail the specific actions you took to address the task.
- **Result:** Share the outcome or results of your actions.

For example, if asked about handling an upset passenger, a candidate might describe a particular incident, how they listened attentively, de-escalated the situation, and ensured the passenger felt valued.
