Gameplay Mechanics Introduced

Step-by-Step Puzzle Solutions

This section provides an exhaustive, stepwise solution to each puzzle encountered in mission 3 of i expect you to die. Following these instructions will allow players to progress methodically and avoid unnecessary retries or deaths. The walkthrough covers puzzle logic, item usage, and sequence of actions required to unlock new areas or disable threats.

Puzzle One: Disarming the Laser Grid

The first obstacle is a laser security grid blocking the main exit. To disable it, locate the nearby control panel hidden beneath a loose floor tile. Access the wiring and rearrange the circuits by swapping colored wires until the grid powers down. Be meticulous with the sequence, as incorrect wiring triggers an alarm.

Puzzle Two: Unlocking the Safe

The next challenge involves opening a safe containing mission-critical documents. The safe requires a combination code derived from clues scattered around the room. Examine the paintings on the wall and note the numbers subtly integrated into the artwork. Inputting the correct sequence reveals the safe's contents.

Puzzle Three: Neutralizing the Poison Gas

As the environment begins to fill with poison gas, players must activate ventilation by locating and

repairing the broken fan switch. Use the screwdriver found under the desk to open the switch panel and reconnect the wires. Once activated, the ventilation system clears the gas, allowing safe passage.

Encrypted Data Chip

Smoke Grenade

The smoke grenade serves as a distraction device to bypass security cameras and guards. Located in the supply cabinet, it can be thrown to create temporary cover, allowing the player to move undetected. Use this item strategically during stealth segments.
