Conditions Treated at Swedish Pain Management Edmonds

Swedish Pain Management Edmonds addresses a broad spectrum of pain-related conditions, offering specialized care tailored to each patient's unique needs. The treatment plans are developed after thorough evaluation, ensuring accurate diagnosis and targeted intervention.

Common Chronic Pain Conditions

Patients at Swedish Pain Management Edmonds frequently seek treatment for chronic conditions such as:

- Lower back pain and sciatica
- Neck and shoulder pain
- Arthritis and joint pain
- Neuropathic pain including diabetic neuropathy
- Fibromyalgia and myofascial pain syndrome

Acute and Post-Surgical Pain

In addition to chronic pain, the center offers management strategies for acute pain episodes caused by injury or post-surgical recovery. This approach helps reduce discomfort and promotes faster healing.

Innovative Pain Management Treatments

Swedish Pain Management Edmonds integrates cutting-edge treatment modalities designed to provide effective relief while prioritizing patient safety. The center continuously updates its protocols to incorporate the latest advancements in pain medicine.

Interventional Procedures

Interventional treatments at Swedish Pain Management Edmonds include minimally invasive techniques such as nerve blocks, epidural steroid injections, and radiofrequency ablation. These procedures target specific pain sources to reduce inflammation and interrupt pain signals.

Medication Management

The center emphasizes responsible medication use, balancing efficacy with the potential for side effects. Customized medication plans may involve non-opioid analgesics, muscle relaxants, and, in select cases, carefully monitored opioid therapy.

Physical Therapy and Rehabilitation

Complementing medical interventions, physical therapy plays a vital role in restoring mobility and function. Swedish Pain Management Edmonds collaborates with rehabilitation specialists to design exercise and stretching routines that support long-term pain relief.

Complementary Therapies

The pain management program also incorporates complementary therapies such as acupuncture, biofeedback, and cognitive-behavioral therapy. These methods address the psychological and emotional aspects of pain, fostering holistic healing.

Multidisciplinary Team and Patient Care Approach

The success of Swedish Pain Management Edmonds lies in its multidisciplinary team of healthcare professionals who work collaboratively to create individualized care plans. This team-based approach ensures comprehensive evaluation and treatment from multiple perspectives.

Team Composition

The multidisciplinary team includes:

- Board-certified pain specialists
