Understanding the TACHS Exam

The Test for Admission into Catholic High Schools (TACHS) is designed to assess the academic abilities and readiness of students seeking admission to Catholic secondary schools. The exam is administered annually and evaluates a range of skills that are essential for high school success. Understanding the structure and content of the TACHS exam is critical for effective preparation.

Exam Format and Timing

The TACHS exam typically consists of multiple-choice questions divided into several sections. Students are allotted a fixed amount of time to complete the entire test, usually around two and a half hours. The timed nature of the exam requires test-takers to manage their time efficiently during each section.

Scoring and Admission Criteria

Scores from the TACHS exam are combined with school records and other criteria to determine admission eligibility. Each Catholic high school may have different cutoff scores or weightings for various sections, making it important for students to perform well across all tested areas.
