Understanding the Tahari ASL Size Chart

The Tahari ASL size chart is a standardized reference that aligns body measurements with the brand's clothing sizes. This chart is designed to help shoppers select the correct size based on bust, waist, and hip measurements. Tahari ASL typically offers sizes ranging from 0 to 18, corresponding to standard U.S. women's sizing. Understanding this chart is the first step to ensuring a flattering fit.

Size Breakdown by Measurements

The size chart categorizes sizes by three critical measurements: bust, waist, and hips. Each size corresponds to a range of inches for these measurements, which allows for flexibility in fit:

- **Bust:** The circumference around the fullest part of the chest.
- **Waist:** The narrowest point around the midsection.
- **Hips:** The fullest part around the hips and buttocks.

For example, a size 6 typically corresponds to a bust measurement of 35-36 inches, waist 27-28 inches, and hips 37-38 inches. The chart is designed to accommodate average body proportions, but

individual fit preferences may vary.

Understanding Numeric vs. Letter Sizing

Tahari ASL primarily uses numeric sizing (0, 2, 4, 6, etc.), but some retailers may also offer letter sizing (XS, S, M, L). The numeric sizes provide a more precise fit based on measurements, while letter sizing is a generalized category. Knowing how numeric sizes convert to letter sizes can help when shopping across different platforms.

How to Measure for Tahari ASL Clothing

Accurate body measurements are crucial for using the tahari asl size guide effectively. Taking proper measurements ensures that the size selected corresponds closely to your body dimensions, minimizing the need for returns or alterations.

Tools Needed for Measuring

To measure correctly, you will need a flexible measuring tape, a mirror, and preferably a helper for accuracy. Wearing form-fitting clothing or measuring directly over undergarments will provide the most accurate results.

Step-by-Step Measurement Instructions

Follow these steps to measure your body accurately for Tahari ASL apparel:

1. **Bust:** Wrap the measuring tape around the fullest part of your bust, ensuring the tape is level across your back and not too tight or loose.
2. **Waist:** Measure around the narrowest part of your waist, typically above your belly button and below your rib cage.
3. **Hips:** Measure the fullest part of your hips and buttocks, keeping the tape parallel to the floor.
4. **Additional Measurements:** For certain garments such as pants or skirts, measuring inseam, thigh, or rise may also be helpful.

Fit and Style Considerations in Tahari ASL

The fit of Tahari ASL clothing varies depending on the style and cut. The tahari asl size guide should be used in conjunction with fit descriptions to select the best size for your preferences.

Regular, Petite, and Plus Sizes

Tahari ASL offers regular sizing as well as petite and plus size options. Petite sizes are designed for women 5'4" and under, featuring adjusted proportions for a better fit. Plus sizes accommodate fuller figures with corresponding adjustments in cut and ease.

Fit Types and Their Impact on Sizing

Different Tahari ASL garments may be tailored for slim fit, classic fit, or relaxed fit. For instance, a slim fit dress may require sizing closer to your exact measurements, while a relaxed fit top might allow for more ease. Reviewing garment descriptions alongside the size chart is recommended.

Review Product Descriptions and Fabric Details

Fabric composition affects stretch and fit. Items with spandex or elastane offer more flexibility, which may influence size choice. Product descriptions often include fit type and model measurements for reference.

Use Customer Reviews for Fit Insights

Customer feedback often provides real-world insight into how an item fits compared to the official size chart. Look for comments about sizing consistency, fabric stretch, and overall comfort.

Keep Return Policies in Mind
