Program Overview

The Willis Knighton internal medicine residency is a structured postgraduate training program accredited to prepare physicians for board certification in internal medicine. Located within a leading healthcare system, the residency integrates clinical practice, education, and research to develop well-rounded internists. The program fosters a supportive learning environment with access to diverse patient populations, including both inpatient and outpatient settings.

Mission and Vision

The mission of the Willis Knighton internal medicine residency is to educate skilled physicians who deliver high-quality, evidence-based care while upholding professionalism and ethical standards. The program envisions producing leaders in internal medicine who contribute to advancing healthcare delivery and medical knowledge.

Program Structure

The residency spans three years, encompassing rotations across various subspecialties such as cardiology, gastroenterology, infectious diseases, and rheumatology. Training is designed to

progressively enhance clinical reasoning, procedural skills, and patient management capabilities. Residents participate in interdisciplinary rounds, case conferences, and quality improvement projects to broaden their clinical acumen.

Curriculum and Training

The curriculum of the Willis Knighton internal medicine residency balances clinical exposure with didactic learning to ensure comprehensive competency development. It incorporates evidence-based medicine principles, patient safety initiatives, and healthcare systems training.

Clinical Rotations

Residents rotate through multiple essential internal medicine areas, gaining hands-on experience in both acute and chronic disease management. Rotations include:

- General Medicine Wards
- Intensive Care Units
- Emergency Medicine
- Subspecialty Clinics (e.g., Endocrinology, Pulmonology)
- Ambulatory Care Settings

This diverse clinical exposure ensures that residents develop diagnostic proficiency and therapeutic decision-making skills required for internal medicine practice.

Didactic Education

The program incorporates regular educational sessions such as lectures, journal clubs, morbidity and mortality conferences, and board review courses. These sessions reinforce clinical knowledge and keep residents updated on current medical guidelines and research advancements.

Research and Quality Improvement

Residents are encouraged to engage in scholarly activities, including clinical research and quality improvement projects. This involvement fosters critical thinking and an understanding of healthcare delivery improvement strategies.
