Start with Common Five-Letter Words

Analyze Feedback and Letter Placement

Wordle provides color-coded feedback after each guess: green for correct letters in the correct position, yellow for correct letters in the wrong position, and gray for incorrect letters. Interpreting this feedback accurately is essential to narrowing down possible words and refining subsequent guesses.

Keep Track of Eliminated Letters

Maintaining a mental or written note of letters that have been ruled out prevents redundant guesses and streamlines the solving process. This approach maximizes efficiency and conserves attempts for exploring new letter combinations.

Use Letter Frequency and Pattern Recognition
